

INTERESTED IN ELECTRIC?

Here's how to make the switch

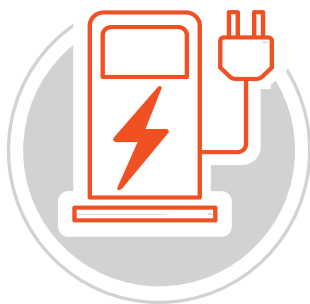

Electric needs assessment

- ❑ **START** talking to your team about going electric
- ❑ **ASK** about your short and long-term objectives
- ❑ **IDENTIFY** routes and segment apps that can go electric
- ❑ **RESEARCH** your electrical capability and capacity
- ❑ **CONNECT** with your utility provider about power needs and upgrades
- ❑ **EVALUATE** the optimal charge times for your operation
- ❑ **CONTACT** your dealer for specs and timelines

Grant funding

- ❑ **DISCOVER** grant opportunities through your dealer and trusted advisor
- ❑ **SHARE** your business story in your applications, from operations to goals
- ❑ **KNOW** award dates, fiscal plans, and requirement deadlines
- ❑ **UNDERSTAND** post-award requirements, terms, and conditions

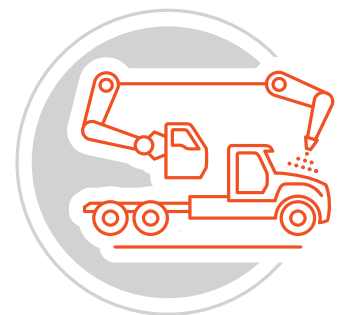

Site planning

- ❑ **DETERMINE** charging locations, power needs, space requirements, and schedules
- ❑ **PULL** permits and understand permit requirements
- ❑ **CHECK** that charger hardware and software are compatible with your vehicles
- ❑ **CREATE** an infrastructure installation plan, from permits and upgrades to installation and vehicle delivery

Vehicle readiness

- ❑ **CONNECT** with your body builder about timing and chassis configuration
- ❑ **ENSURE** chargers are installed and commissioned upon vehicle arrival
- ❑ **SCHEDULE** equipment and safety training with your International Dealer
- ❑ **CREATE** a vehicle monitoring and charging schedule
